### State Course Catalog Changes

Catalog changes occurred over the summer and early fall to accommodate various needs.

#### **AzMERIT**

Assessment will again rely on STC course code information to preload Spring 2016 AzMERIT EOC enrollments the TIDE system. Based on feedback last year, all STC courses aligned to an AzMERIT EOC test have been split into 2 parts to identify which course should be used for EOC testing materials. Part 1 should be considered first semester material (or any portion considered first part), and Part 2 should be considered as the completion of the required course and thus should be chosen for TIDE upload.

A listing of the EOC changes listed on the document can be found [here](#).

#### **SCED codes changes**

SCED codes were updated at the national level with items such as updated course descriptions, archived courses and course codes changes (see note below).

#### **SEI and CTE courses**

Several changes occurred such as eliminating and adding courses to accommodate program changes and/or to help LEAs make better course selection decisions.

**\*\*Note:** All changes have been published in a change document to help you manage any action or validation you need to perform. In reference to archived courses, please discontinue use of these courses ASAP. If you need assistance with this endeavor, please do not hesitate to contact us. \*\*

### STC Website

#### **STC 2015/2016 Submission Windows**

**BOY:** July 1, 2015 – October 9, 2015

**40<sup>th</sup> Day:** August 3, 2015 – October 23, 2015

**100<sup>th</sup> Day:** November 9, 2015 – February 20, 2016

**TIDE Uploads dependent on STC data**

**12/23 initial upload**

**1/15 intermediate upload**

**1/28 final upload**

**EOY:** March 11, 2016 – June 30, 2016 –TBD

#### **STC and AzEDS in FY16**

FY16 represents the last year that STC data will be collected separately from AzEDS. SAIS remains the system of record until FY17, which means that STC data still needs to be collected via SRM for FY16.

While data submitted via AzEDS in FY16 does include STC data elements, these data are **not** fed into SRM.

**As a result, even once an LEA has transitioned from SAIS to AzEDS, STC data must still be submitted separately, same as the past 3 years, for the FY16 data submission.**
